

Living Things & the Environment Notes Review

Name: _____ Date: _____

Group: _____ Section: _____

- 1) What basic needs are provided by an organism's habitat?

- 2) Define the terms biotic factors and abiotic factors.

- 3) Explain why water and sunlight are two abiotic factors that are important to all organisms.

- 4) List these terms in order from the smallest level to the largest: population, organism, ecosystem, community.

- 5) Would all the different kinds of organisms in a forest be considered a population or a community? How do you know?

Performance Task

What habitat do you live in? Write a one-paragraph description of your habitat. Describe how you obtain the food, water, and shelter you need from your habitat. How does this habitat meet your needs in ways that another would not?
